

Situation Update on COVID-19: 30 November 2020

The COVID-19 pandemic has already been shaped a global economic and humanitarian crisis of a completely different magnitude. Declared as a global pandemic by the World Health Organization (WHO), it has prepared several guidelines to fight against pandemic. Governments across the world enforce lockdowns to suppress the spread of Covid-19 although many countries have been unable to contain its spread. However, it has been detected in **213** countries so far. The COVID-19 has already resulted in **1,469,288** deaths globally; the confirmed COVID-19 positive cases are **63,288,799** where **18,041,388** are the active cases¹.

Bangladesh is not new to disasters or major humanitarian crises. The COVID-19 pandemic, however, is a crisis of a completely different magnitude and one that will require a response of an unprecedented scale. The first case of Covid-19 in Bangladesh was detected on 8 March 2020. However, the confirmed COVID-19 positive cases are increasing on a daily basis. Compare to the total conducted test of COVID-19, **16.43%** is tested positive today, on the one hand. The recovery rate is **3.27%** out of total **77,577** active cases. Moreover, **2,191** deaths were recorded from 8th March to 13th June with COVID-19 symptoms². To control the situation and the spread of COVID-19, the government has taken several measures which include confirmed Social and Physical Distancing, Countrywide Lockdown, Institutional and Home Quarantines etc.
